FOR IMMEDIATE RELEASE

BPS Oil & Gas Welcomes New President

Holding company onboards Daniel Rey to further adoption of NRGMax-powered chemicals

(ARGYLE, TEXAS – December 16, 2020) – BPS Oil & Gas, LLC has brought in energy industry veteran, Daniel Rey as the president of the organization. Rey will oversee strategic growth initiatives for the company whose signature technology is NRGMax®, a supramolecular host chemistry that enhances the efficacy and economics of chemicals used across the oil and gas sector.

Rey brings a deep expertise and more than two decades of experience in petrochemicals. Previously, he was with Nalco Champion, an Ecolab Company, where his roles spanned both upstream and downstream divisions of the company. His leadership roles over the years have crossed a number of functions, from operations to sales, marketing, and partnership development—the diversity of experience gives Rey a stand-out track record.

BPS Oil & Gas is a division of BPS Technology. Bravis Brown, CEO of the parent company, shared, “Danny brings the right leadership qualities at the right time for our oil and gas business. Obviously, the market has experienced a lot of volatility this year; Danny’s experience and values will allow our energy division to strategically grow by pursuing licensing and joint development ventures utilizing our NRGMax technology.”

BPS Oil & Gas oversees research and development of chemical formulas that integrate NRGMax. Innovations from the company include surfactants, a green acid, phosphoric acid, and a forthcoming H₂S scavenger that enhances the performance of MEA triazine. Some formulations are then exclusively manufactured by Shotwell Hydrogenics for direct sales to oilfield operators. BPS Oil & Gas focuses on licensing agreements for oil and gas entities looking to enhance their current formulations.

“NRGMax is really unlike anything I’ve encountered during my career, and I’m energized by the technology’s ability to not only enhance efficiency and performance, but to help petrochemical providers reduce costs and develop products that are more environmentally friendly,” said Rey. “The company culture at BPS is a great fit, and I see a lot of opportunity to create quick wins as well as long-term impact.”

Rey holds a Bachelor of Science in Engineering Technology, Industrial Distribution from Texas A&M University. He and his wife reside in Houston, and he has three children.

About BPS Oil & Gas

BPS Oil & Gas, LLC is a Texas-based technology company seeking to enhance how chemicals are utilized and deployed in Upstream, Midstream, and Downstream applications. Their proprietary NRGMax host chemistry enhances end-product performance for a wide range of oil and gas chemicals. The results are more efficient applications and reduced operating costs for operators across the industry. Whether it’s in the oilfield, the pipeline, or at a refinery, BPS Oil & Gas is committed to significant return on customer investments. BPS Oil & Gas is a division of BPS Technology, a privately held holding company. Learn more at bpsoilandgas.com.
